Measurement Channels:

- 30 slots, 6 structures each
- 30 PCBs, 6 structures each
- 15 slots, 12 structures each
- Slots can be allocated to up to 4 groups
- Each groups can have 6 or 12 channels

Failure Criterion:

- Multiples of Start Impedance
- Absolute Impedance Value
- Leakage Current
- Sort Circuit Condition, always been determined
- Disconnection, always been determined

Climate Chamber Control:

- Monitoring Temperature Levels
- Monitoring Moisture Levels
